

## Curriculum Vitae for Denise E. Welker

Denise E. Welker is CEO and President of Welker Flow Measurement Systems, Inc. She has been involved with major decisions and has worked for the corporation for several decades. She has extensive experience in local community affairs.

### Corporate Responsibilities:

Payroll control

Contract overviews

Firm strategies and planning reviews

### Recent Corporate Activities:

Prepared and conducted training for management team as part of recent company re-organization.

Participated in recent plenary session following successful completion of \$2.1-million contract with

- Chevron Production for an extensive gas measurement system at Chevron's Bangladesh location.
- Also participating were all managers and heads of measurement functions within Chevron hydrocarbon-production facilities.

Participated in contract pre-award meeting with Mexicana de Gas where engineers and management from the customer and Welker Flow discussed functional and contractual details of a gas measurement system for the customer's project in Monterey, Mexico.

### Personal Characteristics:

Mrs. Welker was born in Chicago, Ill. She is 49 years old and in excellent health. Along with her activities for Welker, she has raised 5 children, and her four sons, all college graduates, work currently for Welker companies. Her daughter is enrolled at Oklahoma University. Mrs. Welker's passion and main method of relaxation is long distance running, probably influenced by her American Indian heritage. She has run several marathons "just for kicks". Her current goal is training to run an Ultra Marathon of 100 miles! She also bowled professionally with the LPBT (Ladies Professional Bowlers Tour) for about six years, and holds several American Bowling Congress (ABC) records. For twelve years before her children left home for college, she volunteered many hours at their schools and was active in other community organizations. Her duties with Welker now demand the majority of her time.
